

Your Building Should Think The Way You Do.

Today's buildings must be efficient to accommodate a variety of lifestyles, and fast-paced, always-changing workplace.

Users want environments adapting to their needs from room temperature to access to concierge services with the flexibility to accommodate the changing user / tenant requirements, while limiting operating costs by efficiently managing lights, curtains blinders, HVAC, security and so on.

Operators can have access to building remotely, with a flexible, easy-to-use system. The goal is to find support for a range of activities and preferences, while managing costs and increasing revenues.

An innovative, new technology solution that allow to deliver flexible, personalized services, differentiate the property while optimizing comfort levels, accommodating the changing needs and improving end user experience.

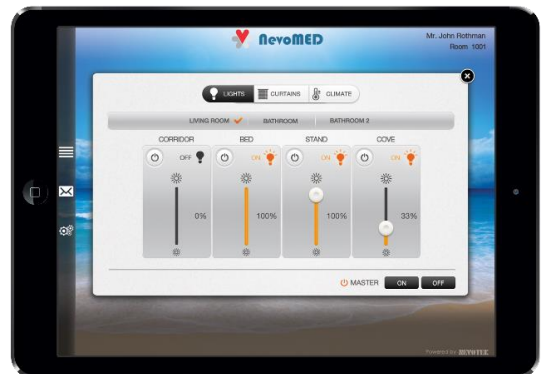

### Features and Benefits

- ✓ integrate room management, building and back office systems with smart monitoring and control capabilities

## Intelligent Monitoring and Management

- ✓ All assets can be controlled via flexible solution which combines building automation capabilities and lighting, wiring, HVAC, building access controls, TV and video cameras (virtually any device that can be connected to a building / room management systems)
- ✓ Building managers, owners, operators and end-users, can regulate services on premise or remotely via a Smart phone, Tablet, IPTV, or a standard web browser.

- ✓ Supports OPC protocol, allowing easy integration and access to numerous building and room controls systems,
- ✓ With this level of automation, buildings can be adapted to changing needs of the users on a timely basis
- ✓ One-touch in-room mood settings (e.g. night, movie, romantic, daylight, ...) to change lights, curtains, A/C, and so on to a pre-set state.
- ✓ Learning Algorithms can identify the irregular states and eliminate misuse,
- ✓ Recommendation engine can make actionable suggestions to save energy and optimize consumption vs comfort,
- ✓ Solution can be implemented as **Cloud based** or **On-Premise**.

## About Us

Nevotek empowers its customers by providing unparalleled user experiences to their guests and end-users.

Nevotek with its broad vision and expertise is fully dedicated for providing dynamic, value-added info-tainment solutions

Using advanced technologies to develop our highly programmable unified solution platform results in an innovative product suite addressing integration needs of different types of customers and providing unparalleled user experience for the guests.

Our customers count on our excellence combining benefits of our extensive business expertise with strong industry alliances, ease of use with innovations, and our reliable responsiveness and availability anywhere on five continents and the seven seas.
